Forecast for Friday 25 Dec 2020

Weather: More in the way of cloud after midnight but still clear spells and a moderate frost. It will be a dry and bright start to the day. Some sunny intervals during the morning but increasing cloud through as the day wears on. During the afternoon it will become quite dull with a few outbreaks of sleet, drizzle or light rain showers. Rain becoming a bit more persistent for a time later in the evening.

Chance of cloud free mountain/hill tops above 700m: 70% for much of the day there will only be high level cloud but by mid afternoon some lower cloud may shroud the tops at times, particularly in the west.

Visibility: Mainly very good, perhaps moderate in light rain outbreaks during the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Freezing level lifting quite quickly during the day so most precipitation in the afternoon will be rain. Northerly winds backing southwesterly and strengthening as milder air pushes in across the area.

Forecast for Saturday 26 Dec 2020

Weather: Mainly dry and cloudy in the morning with a few rain showers but thicker cloud and rain will spread across the Mournes during the afternoon and it will be very windy, possibly storm force on the hill tops. A few sleety showers for the highest tops.

Maximum wind: Southwesterly 30-35mph gusts 50-55mph, gusts around 65mph likely on higher tops.

Chance of cloud free mountain/hill tops above 700m: 20% chance, most of the fell tops will be shrouded by extensive low cloud with a base around 500m especially in the west, in the east cloud bases will be around 700m and there will be a few more gaps.

Visibility: Mainly good but becoming moderate in the afternoon. Perhaps poor in rain later.

Temperature: **Valleys:** Plus 6 Celsius.
At 700m: Plus 2 Celsius
Freezing level: Around 1000m
